

LUKi and the Lights

A new film called LUKi and the Lights is now available on the Global Neuro YCare website.

When Anjo Snijders was diagnosed with a form of MND aged 35, he and his wife, Sascha, wanted to explain MND to their young kids in a way that was accessible, fun and thoughtful. Both teachers, Anjo and Sascha began to look for resources to help explain MND to their children.

In the absence of anything helpful, they created LUKi, in partnership with Dr. Kavanaugh and Global Neuro YCare.

LUKi & the Lights is a silent film – using no language, only sound, to tell the story of LUKi and MND so it is accessible to viewers around the world. To view the film, please click [here](#)
